SUMMARY

Fullstack engineer with nearly 1.5 years of professional experience shipping production web systems end to end — interface, API, database, and deployment. Works across TypeScript/React, Rust, PHP/Laravel, and Python, with recent focus on AI orchestration, retrieval-augmented generation, and third-party platform integrations. Shipped three municipal e-government systems now live in Balikpapan, and spent more than three years teaching Machine Learning, Algorithms & Data Structures, and Web Programming at university level.

EXPERIENCE

Lead Fullstack Engineer · PT Rigo Inovasi Digital

Hybrid · Jan 2026 – Present

- Lead architecture, code review, and SDLC standards for a team of 8 interns, 4 of them directly managed, reporting to the project manager.
- Architected a multi-tenant B2B omnichannel chatbot platform (NestJS/Fastify, Next.js 16, Prisma, PostgreSQL, Redis, Temporal) unifying WhatsApp, Instagram, Telegram, LINE, and web chat into per-tenant workspaces, used by 10 business users across client organizations.
- Built ReplyGo, a link-in-bio storefront product with a Rust/Axum and PostgreSQL backend and a React/TypeScript frontend, covering product catalog, Xendit QRIS checkout, shipping checks, dynamic QR codes, branded invoices, and an AI assistant that answers buyer questions before checkout.
- Designed a retrieval-augmented (RAG) orchestration layer that grounds model responses in each tenant's knowledge base, plus an AI sales agent with evidence-bound product recommendations and lead follow-ups, scoping every query by tenant so one organization's data never surfaces in another's workspace.

Fullstack Developer Intern · Diskominfo Balikpapan

Balikpapan · Feb 2025 – Jun 2025

- Shipped three municipal systems into production during a five-month internship; all remain live today.
- Built an e-signature platform (Laravel) with QR-code stamping, queued background PDF processing, and document verification against official government APIs, deployed for school document signing across Balikpapan's 278 primary and junior-secondary schools (198 SD, 80 SMP).
- Built a personnel management application (Laravel, Tailwind CSS) covering role-based access, dashboards, and workflows for periodic salary review and promotion (KGB) requests.
- Built a Flutter web and mobile public-service application (E-Manuntung) extending communications and informatics services to citizens.

Website Lead · UNITY UMN

Tangerang · Feb 2025 – Jun 2025

- Built and maintained the UNITY UMN English competition site in parallel with the Diskominfo internship; owned event registration and content-publishing flows.

Laboratory Teaching Assistant · Universitas Multimedia Nusantara

Tangerang · Aug 2022 – Dec 2025

- Taught Machine Learning, Algorithms & Data Structures, Web Programming, Mobile Application Programming, and Introduction to Internet Technology.
- Mentored and evaluated 200+ students across laboratory sessions and authored exam materials used for official university assessment.

Teaching Assistant · Boarding School Multimedia Training Program (UMN × LPDP)

Aug 2023 – Sep 2023

- Selected by faculty to teach 25 boarding-school students to build responsive, dynamic websites; authored the daily curriculum.

Web Developer Intern · Dinas Pertanahan dan Tata Ruang, Balikpapan
Feb 2021 – Apr 2021

- Three-month internship supporting internal web tooling: PHP/HTML/SQL data operations and UI/UX updates.

PROJECTS

ReplyGo · Rust/Axum, SeaORM, PostgreSQL (pgvector), React/TypeScript
replygo.id

- Link-in-bio storefront for creators, affiliates, and small sellers: business profile, product catalog, Xendit QRIS checkout, shipping checks, dynamic QR codes, and branded invoices, with an OpenRouter-backed AI assistant that helps followers find products and answer questions before checkout.

Chatrigo · NestJS/Fastify, Next.js 16, Prisma, PostgreSQL, Redis, Temporal
chatrigo.id

- Multi-tenant B2B omnichannel chatbot SaaS unifying WhatsApp, Instagram, Telegram, LINE, and web chat per tenant, with Xendit QRIS billing, a RAG-grounded AI sales agent, conversation summaries, and tenant RBAC.

E-Sign Balikpapan · Laravel, Tailwind CSS, queue workers
edocument.balikpapan.go.id

- Digital signature and document verification for city government: QR generation, asynchronous PDF processing, and integration with official verification APIs. Deployed across the city's school network.

E-KGB Balikpapan · Laravel, Tailwind CSS
kgb.balikpapan.go.id

- Employee salary-review and promotion workflow for municipal staff, with role-based dashboards, process automation, and authenticated access control.

Intelligent Tutoring System · Octalysis gamification
github.com/dzaky2636/adaptive-gamified-its

- Undergraduate thesis: an adaptive tutoring system delivering real-time, personalized feedback, with gamification structured on the Octalysis framework.

SKILLS

- **Languages** — TypeScript, JavaScript, Rust, Go, PHP, Python, SQL
- **Frontend** — Next.js, React, Vite, Astro, Svelte, Tailwind CSS, Bootstrap, Figma
- **Mobile** — Flutter, Dart
- **Backend** — Node.js, NestJS/Fastify, Laravel, Axum, SeaORM, Prisma, Supabase, PostgreSQL, pgvector, Redis, Temporal, Socket.IO, REST & WebSocket APIs
- **AI** — RAG pipelines, embedding retrieval, LLM orchestration, prompt engineering, OpenRouter
- **Infrastructure** — Vercel, Railway, Docker, S3, Git
- **Spoken Languages** — Indonesian (native), English (professional)

EDUCATION

Universitas Multimedia Nusantara · Bachelor of Computer Science, Informatics
2021 – 2026

- GPA 3.71/4.00 · "Excellent"-accredited program · Merit scholarship for ranking in the top 20% of the cohort
- Thesis: Octalysis-Based Gamification in Intelligent Tutoring Systems with AI Agents for Feedback and Adaptive Support

SMK Negeri 6 Balikpapan · Software Engineering
2018 – 2021

- Graduated with honors; named Best Graduate of the cohort

CERTIFICATIONS

Huawei HCIA-AI · Certiport IT Specialist: Software Development · Huawei ICT Competition 2024–2025, National Final (Cloud Track) · TOEIC 960/990 · Duolingo English Test 145/160
